

Incident Response Readiness Assessments

An in-depth look at your technology platforms to determine if they are capable of withstanding and recovering from a cybersecurity breach.

Sentinel's highly experienced team of security experts performs a hands-on evaluation of your organization's IT environment from the frequently overlooked Incident Response perspective. This assessment identifies any weaknesses to help ensure that when an incident occurs, your technology will be redundant, resilient, and ready.

FOCUS AREAS

Readiness assessments can be very broad, or strategically focused on specific areas. This includes:

- Broad-Level Infrastructure Systems
- Backup Infrastructure
- File Systems
- Virtualization Platforms
- Active Directory
- Endpoint Detection & Response Solutions
- Cloud Infrastructure
- Email & Collaboration Services
- Storage Platforms
- Authentication & Authorization Platforms
- Perimeter Networking

KEY BENEFITS

- Identify Technology Stack Limitations
- Configuration Reviews
- Review Operations Policies & Documentation
- Actionable Roadmap Development
- Executive Briefing
- Technical Findings Report
